TECHNOLOGY

1. FDP Technology

Patent technology of ICEPIPE-Improved heat dissipation by fast heat transfer using FDP

- \cdot Sufficient heat dissipation area
- · ICEPIPE's thermal conductivity = 40,000 W/m·K
- · Less raw materials used reducing the weight and production cost

2. Clamping Technology

Unique heat dissipation technology using directional and elastic clamps

- · Mechanical coupling to use oscillating capillary tube heatsink as heat dissipation material
- · Mechanical bonding of heating part and heatsink made excellent durability
- · Pressurized assembly by using elastic deformation of clamp
- · Improved heat dissipation performance and reduced material cost compared to conventional adhesive (epoxy, etc.) bonding methods
